## Alerts summary

| Rule ID | Description                                                                                                                                                                                             | Level | Count |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|-------|
| 5501    | PAM: Login session opened.                                                                                                                                                                              | 3     | 266   |
| 92200   | Scripting file created under Windows Temp or User folder                                                                                                                                                | 6     | 259   |
| 5402    | Successful sudo to ROOT executed.                                                                                                                                                                       | 3     | 251   |
| 92154   | Process loaded taskschd.dll module. May be used to create delayed malware execution                                                                                                                     | 4     | 143   |
| 92153   | Suspicious process loaded VaultCli.dll module. Possible use to dump stored passwords.                                                                                                                   | 10    | 34    |
| 92213   | Executable file dropped in folder commonly used by malware                                                                                                                                              | 15    | 24    |
| 92151   | Binary loaded PowerShell automation library - Possible unmanaged Powershell execution by suspicious process                                                                                             | 12    | 18    |
| 92217   | Executable dropped in Windows root folder                                                                                                                                                               | 6     | 15    |
| 5715    | sshd: authentication success.                                                                                                                                                                           | 3     | 12    |
| 5503    | PAM: User login failed.                                                                                                                                                                                 | 5     | 11    |
| 61138   | New Windows Service Created                                                                                                                                                                             | 5     | 10    |
| 92027   | Powershell process spawned powershell instance                                                                                                                                                          | 4     | 10    |
| 92057   | Powershell.exe spawned a powershell process which executed a base64 encoded command                                                                                                                     | 12    | 9     |
| 92058   | Application Compatibility Database launched                                                                                                                                                             | 12    | 8     |
| 92033   | Discovery activity spawned via powershell execution                                                                                                                                                     | 3     | 6     |
| 92039   | A net.exe account discovery command was initiated                                                                                                                                                       | 3     | 5     |
| 5760    | sshd: authentication failed.                                                                                                                                                                            | 5     | 4     |
| 92032   | Suspicious Windows cmd shell execution                                                                                                                                                                  | 3     | 4     |
| 92204   | Powershell process created executable file in AppData temp folder                                                                                                                                       | 9     | 4     |
| 92004   | Powershell process spawned Windows command shell instance                                                                                                                                               | 4     | 3     |
| 92031   | Discovery activity executed                                                                                                                                                                             | 3     | 3     |
| 506     | Wazuh agent stopped.                                                                                                                                                                                    | 3     | 2     |
| 5902    | New user added to the system.                                                                                                                                                                           | 8     | 2     |
| 60118   | Windows Workstation Logon Success                                                                                                                                                                       | 3     | 2     |
| 92029   | Powershell executed script from suspicious location                                                                                                                                                     | 6     | 2     |
| 92201   | C:\Windows\System32\WindowsPowerShell\v1.0\powershell.exe created a new scripting file under Windows Temp or User data folder                                                                           | 9     | 2     |
| 92307   | Evidence of new service creation found in registry under HKLM\System\CurrentControlSet\Services\CaptureService_c6c60\ImagePath binary is: C:\Windows\system32\svchost.exe -k LocalService -p            | 3     | 1     |
| 92307   | Evidence of new service creation found in registry under HKLM\System\CurrentControlSet\Services\DeviceAssociationBrokerSvc_e9fd4\ImagePath binary is: C:\Windows\system32\svchost.exe -k DevicesFlow -p | 3     | 1     |
| 92307   | Evidence of new service creation found in registry under HKLM\System\CurrentControlSet\Services\PenService_c6c60\ImagePath binary is: C:\Windows\system32\svchost.exe -k                                | 3     | 1     |

| Rule ID    | Description                                                                                                                                                                          | Level | Count |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|-------|
| PenService |                                                                                                                                                                                      |       |       |
| 92307      | Evidence of new service creation found in registry under HKLM\System\CurrentControlSet\Services\UdkUserSvc_c6c60\ImagePath binary is: C:\Windows\system32\svchost.exe -k UdkSvcGroup | 3     | 1     |
| 2502       | syslog: User missed the password more than one time                                                                                                                                  | 10    | 1     |
| 504        | Wazuh agent disconnected.                                                                                                                                                            | 3     | 1     |
| 5132       | Unsigned kernel module was loaded                                                                                                                                                    | 11    | 1     |
| 5403       | First time user executed sudo.                                                                                                                                                       | 4     | 1     |
| 67018      | System shutdown initiated.                                                                                                                                                           | 3     | 1     |
| 67028      | Special privileges assigned to new logon.                                                                                                                                            | 3     | 1     |
